

Updated by Mathias PFAUWADEL 1.1

- 1.1 : Adding pop to all object if it's exist
- 1.0 : 1st version working

### Description

### Screen Shot

## Options

If you put `<@ @>`, only the part inside will be clickable on drive you to the objectPage

If you put `<#nameofthePopOut #>`, this will create an icon, when clicking it will open the popOut

Go into src\cdsEnhanced.js  
var popOutEnableByDefault = true;  
put the value to false
