| Name	** Custom Display String Enhanced** Version
Updated by Mathias PFAUWADEL	1.1

Patch Notes

- 1.1 : Adding pop to all object if it's exist
- 1.0 : 1st version working

To be Done

Description

Allow you to modify the custom display string to be more flexible

Screen Shot

Node setup

```
if the {objectType}_diagram_popout exist, it will automatically add the pop ico
if you want a specific pop out use that syntax
<@{name}@> GDPR <#process_diagram_popout#>
```

Options

URL to the object Page :

If you put <@ @>, only the part inside will be clickable and drive you to the objectPage

Diagram pop-out :

If you put <#nameofthePopOut#>, this will create an icon, when clicking it will open the popOut
If you put <#HTML#nameofthePopOut#>, this will create an html element, when clicking it will open

the popOut

Disable the automatic icon

Go into src\cdsEnhanced.js

```
var popOutEnableByDefault = true;
```

put the value to false
